
Ram Truck DT & Heavy Duty DRL Activation 2019+

Starting in 2019 Ram trucks (DT, Heavy Duty Pick Up and Cab Chassis) without government mandated Daytime Running Lights (DRL's) have the ability to enable or disable DRL's in the vehicle menus. Vehicles sold in countries that require DRL's such as Canada the DRL functionality can not be disabled.

Depending on the vehicle options and menu screens available, either radio display U-Connect or cluster will have the menu to enable or disable DRL's.
