

High Amperage Power Point (HAPP)

- Available on all heavy duty trucks Pick-Ups and Cab Chassis.
- Open the cover on the power bus on top of the battery on the drivers side to access.
- M8 Stud on the top of the battery.
- Connection is tested to 300 Amps capability with the proper eyelet and connection.
- Grounding to Engine Block is Recommended.
- Ground wire should be High Flex cable.
- Eyelets need to be robust enough to withstand mechanical stress and corrosion.
